PROFILE SUMMARY

Frontend Developer with hands-on experience building responsive and production-ready web applications using React and Tailwind CSS. Skilled in creating admin dashboards, portfolio websites, and API-driven user interfaces. Actively seeking remote frontend opportunities.

PROJECT EXPERIENCE

Admin Dashboard

- A modern admin dashboard application designed to manage users efficiently with role-based access control. The dashboard provides a clean UI for viewing statistics, managing users, and performing CRUD operations, making it suitable for real-world admin use cases.

- ⚙ Key Features
- Role-based navigation (Admin / User)
- Create, read, update, and delete users
- Protected routes for secure access
- User status management (Active / Inactive)
- Data visualization using charts
- Search, filter, and pagination functionality
- Responsive design for all screen sizes

Portfolio Website

- A responsive and modern portfolio website built to showcase projects, skills, and experience. The website features smooth navigation, animated UI elements, and a clean layout designed to create a strong first impression for recruiters and clients.

- ⚙ Key Features

- Clean and modern UI design
- Animated hero section with illustration
- Project showcase with reusable cards
- Dedicated resume page with download option
- Responsive navigation bar
- Mobile-friendly layout
